

## **JAM TOPICS LIST**

Here we are providing some important Topics for your JAM Preparation. Have a look.

### **1. Global warming**

Global warming is increased in earth average surface temperature due to the effect of greenhouse gases, deforestation and burning of fossil fuels. When we burnt fossil fuels such as oil, petroleum and natural gas many chemicals are sent into the atmosphere which will deplete the ozone layer.

If ozone layer gets depleted it could have holes in it and sun-rays will fall directly on the earth because of this phenomenon we could see a sudden change in rainfall pattern.

People are facing so many challenges because of global warming.

- Sudden change in rainfall pattern.
- Droughts and fires
- Floods and hurricanes.
- Malaria and skin cancer in new warmer regions.

Let us understand how we can save our environment.

- We need to plant more trees.
- Reduce excessive usage of electricity and plastic.
- Reduce excessive usage of water.
- Use solar energy products and most important of all.

- Create awareness among people about global warming.

I am sure; if we follow these steps we can save our environment.

## **2. FAVOURITE COLOUR**

My favorite colour is white. It is a calm, delicate and bright colour. The origin of any colour is white. It is the symbol of purity and peace; even our Indian flag has white colour indicating the peace of our nation.

White colour is used for identity and this is the reason politicians wear white colour attire which makes them look dignified. Doctors and nurses wear white colour coats which show the calm nature of the colour and angels are also dressed in white which shows their superiority.

Many things in nature are in white. Milk is white; the surf of sea waves are white, many fragrant flower are white and the innocent smile of a child is compared to this color.

White color is a sign of sacrifice. White colour is also used as a sign of surrenderance to an enemy. White colour is also used as a symbol for beauty.

In summer many people prefer to wear white dress so that they can be affected less by the heat.

White colour suits my personality as I am simple and honest person. It is a simple colour which resembles simplicity. I feel elated whenever I wear white colour dress. Thus, the reason I love white colour.

### **3. IMPACT OF SOCIAL NETWORKING SITES**

In today's world, where everything is just one click away. Social networking sites have become the need of the present world.

Social networking sites and social media has revolutionized the world, bringing us closer than ever before and making life easier. They are very much useful not only to the youths but to all generations.

However, every coin has two sides and addiction to anything is always bad. Being on social networking site means one should be social but we are social more on networking sites and are keeping our self's away from social life

These networking sites are changing the mindsets of the youths, people are living in the virtual world and trying to present a virtual picture of their life and updating on social sites. We are not enjoying our real life but trying to pretend our virtual world to be perfect. We are publishing our personal life for a few minutes of attention among few people in the virtual world.

Too much use of social networking sites are making individuals dumb. Thus, today's youth are engaged in cybercrimes.

In the end I would like to say social networking is a medium through which we can learn things broadcast our knowledge, experience and views

We can either misuse this or use it for a better life. All depends upon us and the choice is ours.

### **4. TEAM WORK**

Today I would like to share my views on team work.

Team work is the ability to work together towards a common vision. The ability to direct individual accomplishment towards organizational objectives.

It is the fuel that allows common people to attain uncommon results as quoted by-Andrew Carnegie.

TEAM - Together Everyone Achieve More.

In order to build a strong team we need to have a common vision that drives everyone together. We need effective team players to build a strong team.

A team player is someone who is able to get along with their colleagues and work together in a cohesive group.

There are 5 stages in a team building.

1. Forming.
2. Storming.
3. Norming.
4. Performing.
5. Adjoining.

Let us understand

What are the skills that are required in building a strong team.

- a. Listen.

- b. Question.
- c. Respect.
- d. Help.
- e. Share.
- f. Participate.

Most important of all every member should complement and appreciate other team members. There should be a clear communication among team members.

## **5. CORRUPTION IN INDIA**

Corruption in India is one of the most menacing threats that our economy has been battling with ever since the independence. At all levels of Indian bureaucracy, corruption has seemingly taken its toll and has been corroding the structure of our nation.

Be it private sector or public sector, Indian people have a tendency of misusing the public position in their favor to fulfill their motives and gain personal benefits.

A recent unofficial data published by 'THE HINDU' estimated that, Indians had over \$1456 billion in Swiss bank. India stands among one of the most corrupt nations in the world.

Causes:-

When evaluating the causes responsible for corruption. The number seems to be infinite. However the main reason is lack of implementation of the rules and laws.

There are numerous laws like Indian penal code and the prevention of corruption act that have been framed to stop corruption but their implementation is missing.

Another prominent reason for corruption is lack of transparency in bureaucracy and governmental processes.

Consequences:-

The consequences of corruption are grim. The whole system falls apart if the structure of government is struck by the storm of corruption.

The ones who are not so rich and unable to pay bribes officials, they don't get their work done on time and their files collect dust in the offices.

How to reduce corruption:-

When it comes to fighting this adversary, the first blood must be drawn by general public. If there are no individuals that pay bribe then the structure automatically resurrects again.

The implementation of laws should be stricter and increased transparency must be brought into action, unless the general public becomes vigilant, corruption cannot be unplugged from our nation.

## **6. CUSTOMER SERVICE**

Customer service is the service provided by the companies to their customers to resolve their queries. It is beneficial for both customers and the companies. If company provides better customer service then they can attract new customers and can retain old customers.

With the increase in customer service centers popularly known as call centers or BPO'S. there is increase in employment opportunities. The main criteria are good communication skills and telephone etiquettes.

Now a day's product quality and delivery are basis of business the only difference left is superior customer service.

The modern mantra of getting success in business is superior customer service

## **7. COLLEGE DAYS**

College life is that phase in one's life when one learns the most important lessons of his/her life. It is for the first time when an individual is left to himself to make his own decisions. The importance of maintaining good and healthy relations with seniors, batch mates and faculty is known in this very important phase of life called "college life".

The art of making things happen while working in a group or a team by coordinating with each other is well learnt during college days. For instance, when I worked in a group of four members on a project, it was the sense of being in one team that bind all of us together and motivated all of us to put in a collective effort in working towards achieving the goal of project completion.

Today, as a professional when I am asked to work in a team, it is very easy for me to coordinate with my team mates.

I developed the habit of listening to the ideas of all the people working in a group and have an elaborate discussion among the team members to decide on what needs to be done.

Another important lesson which I learnt during my college was to maintain good relations with my professors, seniors and also my batch mates. It always helped me to gather information about any subject or any other work.

Overall I can say I enjoyed and learnt during college days.

## **8. IMPORTANCE OF COMMUNICATION SKILLS**

Good communication skills are an indispensable asset without which the goals are unreachable. Be it in any field IT, ITES, banking, finance, and insurance, BPO'S, call center, retail or any other field.

Communication refers to exchange of thoughts and ideas with the intention of conveying information. Communication is a two way street that includes vocalization as well as expression.

The purpose of communication is to convey one's belief, ideas, thoughts or needs with clarity so as to reach a mutually acceptable solution.

The importance of communication skills cannot be underestimated,

Good communication skills are necessary in all walks of life. The lack of effective communication skills has a negative impact on the personal as well as professional life of a person.

Good communication skills are a prerequisite for healthcare providers, teachers, salesman, corporate employees and many more.

Communication does not refer only to articulating words but it also refers to feeling an expression.

In the end I would like to say if we have clarity, expression, feelings and intention to convey thoughts with respect then I believe the goal of communication will be accomplished.

## **9. SUPERIOR CUSTOMER SERVICE**

You can use customer service as a powerful way to set yourself apart from your competition. It's one of the strengths small business possess. You can compete with larger companies who may offer more variety, lower prices and other things that you can't afford. However, sometimes they compromised on customer service.

To make sure your business succeed, the most important thing that is required is superior customer service.

There are few basic rules or I should call it as fundamentals to provide superior customer service are

Apologize, don't debate:- if a customer has a problem, apologize and fix the problem, make sure to let customers vent their grievances even if you are tempted to interrupt and correct them.

Feedback keep you focused:- ask your customers to rate your service on a regular basis. This can be done via a short questionnaire included with every product sold or mailed to key clients. Keep the questionnaire short so that it is not a burden for customers to complete and make sure that they are aware about feedback forms.

Stay flexible:- you must be flexible when it comes to your customers and clients, provide that comfort level to your customers, so that they can feel that, we are treating them with utmost care.

Always say 'yes':- this doesn't mean giving up your personal will to your customers but it does mean finding a way to help customers with their requests. EX: - if you run a gift business you might wrap a present for an important client, even if you don't usually provide gift wrapping.

Under promise, over deliver:- make your customers believe that they are important to you by always appearing to go to extra mile. Build a little cushion into a deadline and deliver early. Estimate that a job will cost more than you think and bring it in lower.

I believe if we can follow these basic principles we can provide superior customer service.

## **10.CONFIDENCE**

What is confidence?

As is our confidence, so is our capacity – Richard bakh.

Self-Confidence is the number one asset that separate great athletics from rest of pack –Patrick Cohn

People think and share, don't just rely on quotes. To be successful you have to be confident. World is full of competition, if you are confident you can compete with anyone, anytime.

Just remember, someone is doing something when you said it is impossible because you are lacking confidence. Sir Thomas Alva Edison failed thousand times

and worked with several different filaments to invent bulb, because he is confident that he can do it. If he lacks confidence, we might be in dark today.

You will never know your limits until you push yourself to them, don't be limited, be limitless. Think big, think positive, take a risk, be a difference maker and the field is your sanctuary.

In the end I would like to say to be a winner, you have to act, think and feel like a winner.

## **11. EDUCATION SYSTEM IN INDIA**

Education is very necessary for each and every person, because we gain knowledge, wisdom and manners which help us to lead a dignified life.

Now days, every nation is taking steps to make its people educated and eradicate illiteracy from their country. Coming to the education system of India, we can say it is well developed comparing to the past days. But, even we face few problems in the education system of our country.

In the past, India was totally different from now. Today the public and private educational bodies are working together to achieve academic excellence. At the same time education has become commercial with the growth of donation schools and colleges.

In today's education, the standards in English and mother tongue have decreased due to the specialization of subjects in science, technology, mathematics and medicine has increased tremendously. Indian government had succeeded in

advancing the education system by providing primary and higher education to some extent only.

It has to provide a good quality of education comparatively as of private institutions, as many schools under government are not properly built, no proper teaching is done by the teachers, lack of books for students, no proper facilities etc;

Today the private schools have advanced their method education by introducing “Edu-comp” methods, but the government is failing in preceding the normal pattern of education. Thus, it has to take measures in giving proper education and socializing the people to send their kids to schools but not to work because “Today’s children are Tomorrow’s citizens”.

## **12.TRAFFIC**

With the rapid increase of economical globalization and urbanization, more problems are brought to our attention. One of the most common problems is Traffic Jams.

There are so many reasons of traffic jams. Some of the common reasons are,

- Too many Vehicles
- Lack of Public transportation
- Lack of enough roads
- Lack of wide / broaden roads
- Poor control of traffic systems
- Lack of trained drivers
- Lack of modern transportation facilities like metro-ways, elevated express ways, flyovers etc

- Lack of adherence to traffic rules

These are some of the common reasons for traffic jams. We need to understand these problems and should take necessary steps to control traffic jams.

In order to resolve this issue, we need to adhere all the rules and regulations of the traffic systems. Traffic signals should be maintained by automated system. Government should take strict steps in solving this problem.

Unless and until we change our perception and develop a mind to abide traffic rules, whatever strategy will be taken will not work properly.

### **13.CHILD LABOUR**

Child labour is economically unsound, psychologically disastrous and ethically wrong. The lovely childhood of the children has been crippled by the ever growing menace of child labour.

If one conceives the idea of child labour, it brings before the eyes the picture of exploitation of little physically tender, illiterate and undernourished children working in hazardous and unhealthy conditions.

About 250 million children between the age of five and fourteen work in developing countries. Atleast 120 million of these children work on full time basis. In India it is estimated above 28.2 million by the International Labour Organization (ILO)

The origin of problem of child labour can be traced to some complex social vices like illiteracy, poverty, inequality, failure of social welfare schemes, population

explosion etc; But when one considers the economics compulsions of the families which force the children to work, one will be compelled to admit that elimination of child labour will be a distant dream as long as the socio economic status of these families is not improved.

The prevalence of child labour is a slap on the conscience of society. Child labour creates a labour force which is ill-equipped in terms of skills to compete in today's globalized economy. It harms not only the present generation but also the posterity.

Time and again even the supreme court of India has passed orders on the matter with the directives to abolish child labour but the menace continues. Problem of child labour must be recognized as a human rights problem. It has to become a mandatory duty of all governments across the world to take all possible steps to put an end to this problem child labour once and for all.

Today's children will constitute the backbone of tomorrow's society. Hence, it is the social conscience that needs to be awakened and it is the obligation of every generation to bring up children and constitute their abilities to the society.

#### **14.MY ROLE MODEL-A.P.J. ABDUL KALAM**

Avul Pakir Jainulabedeem Abdul Kalam Azad is the President of India, popularly known as Missile Man. The nation knows him as a nuclear scientist and the father of India's successful missile programmed.

A.P.J. Abdul Kalam was born on 15 October, 1931 at Rameswaram, Tamil Nadu. He did his schooling in Ramanathapuram district, for college he moved out of the district and studied in St. Joseph's college in Triuchirapalli and did his diploma in Engineering from Indian Institute Technology, Chennai.

He started his career with DRDO in 1958 and five year later went to ISRO where he became the Project Director of SLV. He led India's first satellite launch vehicle—'Rohini' which successfully lifted in 1980. He then became Programme Director to launch Integrated Guided Missile Development Programme.

In his 14 year work span as Director of Defence Research and Development Laboratory, he developed up Prithvi, Agni, Trishul, Akash and Nag.

As a defense scientist he got Bharat Ratna for his great success in Agni, Prathvi, Akash, Trishul and Nag missiles research. Our nation is proud of him because he brought fame to nation in missile power and challenging researches.

He became the president of India on July 25, 2002. He is the 11th president of India. Before he became the President of India he received numerous awards including Pad am Bhutan in 1981, Padama Vibhushan in 1990 and Bharat Ratan, the country's highest civilian award, in 1997.

After being the president of the largest democracy of the world, perhaps none can have any aspiration left, but Kalam has, of opening a school for the poor children in Rameshwaram. Dr. Kalam says, "If you want to leave your foot prints on the sand of the time do not drag your feet." 'Great dreams and Great dreamers are always rewarded with victory.'

.

The 'Missile Man' rose from his humble background to become the jewel in nation's crown and made missiles for the country thereby making India member of the exclusive club of nuclear powers in the world.

Besides being a scientist of high caliber, the president of India Dr. Abdul Kalam is also a poet and a lover of music. Although he has a very few leisure's in his busy schedule. He is also fond of playing on Veena.

He is a scientist who thinks, dreams, lives and breathes science. Also earlier the greatness of the man is also his simplicity despite having many achievements and honors to his credits.

### **15.Woman Empowerment**

The role of women in society has been greatly overseen in the last few decades. Women and Today's Society Throughout history, men have traditionally been regarded as superior to women in both power and status.

Throughout the ages the roles of women are always changing. Some ages and cultures view the role of a woman as the child bearer. Others look to all aspects of home-life and treat women as child bearer, cook, and maid. As the times change a modern picture of women is becoming almost equal to men; we see women in the work force, women with cell phones, cars, and responsibilities greater than simply raising children.

Recently, however, feminists in Western societies have fought against the societal structures that have allowed men to be dominant over women. Much has been accomplished; women, for example, are now attending colleges and graduate schools in record numbers. In addition, the number of women in the workforce has increased significantly.

There was a time when women were just the kitchen keepers and the house keepers in the Indian society. That was treated as the only field for their activity.

Gradually women began to get educated, even highly educated, and a stage came when some of them came out on the social and political field to rub shoulder with the men equally. In the freedom struggle of India, there are notable names of women who took an active part in the different movements and even reached the top. This was the opening up of the new horizon for womanhood in India.

Women now are in every career and in every field. But this has its own problems too. They have to be mothers, and as mothers, they have to give birth to children and also to rear them up. This becomes for them a major problem. It is the desire of all parents that their children are well looked after; they are properly nursed and cared for and grow up healthy.

The major part of this responsibility falls upon the woman — the mother. In this way balancing between official duties and the home front presents the women-with-a-career, enormous problems. Whatever said or done, the Indian society still remains a man-dominated society and the wife may respectably be called the 'better-half.' These are some of the basic and fundamental problems which the career-oriented woman in the present Indian society has to face.

## **16. Corruption in India**

Corruption in India is a major issue that adversely affects its economy. A study conducted by Transparency International in year 2005 found that more than 62% of Indians had firsthand experience of paying bribes or influence peddling to get jobs done in public offices successfully. In its study conducted in year 2008, Transparency International reports about 40% of Indians had firsthand experience of paying bribes or using a contact to get a job done in public office.

In 2012 India has ranked 94th out of 176 countries in Transparency International's Corruption Perceptions Index, tied with Benin, Colombia, Djibouti, Greece, Moldova, Mongolia, and Senegal.

Most of the largest sources of corruption in India are entitlement programmes and social spending schemes enacted by the Indian government. Examples include Mahatma Gandhi National Rural Employment Guarantee Act and National Rural Health Mission. Other daily sources of corruption include India's trucking

industry which is forced to pay billions in bribes annually to numerous regulatory and police stops on its interstate highways.

Indian media has widely published allegations of corrupt Indian citizens stashing trillions of dollars in Swiss banks. Swiss authorities, however, deny these allegations.

The causes of corruption in India include excessive regulations, complicated taxes and licensing systems, numerous government departments each with opaque bureaucracy and discretionary powers, monopoly by government controlled institutions on certain goods and services delivery, and the lack of transparent laws and processes. There are significant variations in level of corruption as well as in state government efforts to reduce corruption across India.

## **17.SOCIAL NETWORKING**

A social networking service is a platform to build social networks or social relations among people who share interests, activities, backgrounds or real-life connections. A social network service consists of a representation of each user (often a profile), his social links, and a variety of additional services. Social networks are web-based services that allow individuals to create a public profile, to create a list of users with whom to share connections, and view and cross the connections within the system.

Most social network services are web-based and provide means for users to interact over the Internet, such as e-mail and instant messaging. Social network sites are varied and they incorporate new information and communication tools such as mobile connectivity, photo/video/sharing and blogging.

Online community services are sometimes considered as a social network service, though in a broader sense, social network service usually means an individual-centered service whereas online community services are group-centered. Social networking sites allow users to share ideas, pictures, posts, activities, events, interests with people in their network.

Web-based social networking services make it possible to connect people who share interests and activities across political, economic, and geographic borders. Through e-mail and instant messaging, online communities are created where a gift economy and reciprocal altruism are encouraged through cooperation. Information is suited to a gift economy, as information is a non-rival good and can be gifted at practically no cost.

Facebook and other social networking tools are increasingly the object of scholarly research. Scholars in many fields have begun to investigate the impact of social-networking sites, investigating how such sites may play into issues of identity, privacy, social capital, youth culture, and education.

Several websites are beginning to tap into the power of the social networking model for philanthropy. Such models provide a means for connecting otherwise fragmented industries and small organizations without the resources to reach a broader audience with interested users. Social networks are providing a different way for individuals to communicate digitally. These communities of hypertexts allow for the sharing of information and ideas, an old concept placed in a digital environment.

## **18.ILLITERACY**

In India the literacy is still hovering around 74% on an average reaching above 90% in Kerala and below 75% in Bihar, Arunachal Pradesh, Jharkhand, etc. All efforts and success in literacy have become obliterated by huge rise in population.

Women population constitutes a larger portion of total illiterate population. In India, the female literacy rate is around 65 percent as against the male literacy rate of around 82 percent. Hence, women education is very important to eradicate illiteracy.

Illiteracy is maximum among Scheduled Caste, Scheduled Tribe and other backward classes who are not only poor, but unaware, unconcerned and unwilling to improve and change their lot. Illiteracy deprives people not only of economic development but also of all benefits of education, reading, writing, etc. remaining within the darkness of ignorance, poverty and impoverishes.

It is essential that the Government of India rises up to the occasion and take all possible steps to set up thousands of primary school all around the country making literacy and compulsory obligation of every citizen without which he will be penalized. For this the primary education has to be made free of tuition fees, all books and papers and instruments including computer to be supplied free.

Unless all citizens are literate or educated they cannot ever read newspaper, circulars, notices, advertisements, posters, and letters from near and dear ones. This will compel the illiterate masses to be deprived of 90% benefit of development, entertainment, sports and games, medical prescription, operate cell phone, T.V and computer.

Students are the builders of a nation. They can do a lot to eradicate illiteracy. They can spend their spare time and holidays in helping illiterate people to become literate, teaching them the habits of hygiene and sanitation.

A blind person cannot witness the captivating beauty of nature. Similarly, an illiterate person remains blindfolded to the charms of the world of learning and knowledge. If and when illiteracy will be removed completely, India will be a new country where 100% people can participate in all programs of economic development.

## **19. Self-Confidence**

Self-Confidence is that big thing without which you cannot achieve anything.

There are few questions you need to concentrate

- a) How many times were you not able to converse with people you wanted to due to shyness and nervousness?
- b) How many times have you felt that you were left in a corner wondering what to do while your friends get what they want?
- c) How many times have you felt sorry for yourself due to lack of confidence and watched helplessly while others moved forward?

I hope now you believe that self-confidence can change your life faster than you can imagine.

Self-confidence is not too difficult to attain. It can be developed very easily. The primary reason

behind the lack of self-confidence is shyness. you need to be comfortable with yourself to come

out of your shell, called shyness, in which you have kept yourself locked up. The shyness in turn

is rooted in fear.

Faith is the other big thing you should develop. Faith is defined as a strong belief in something that

is beyond proof. If you don't believe in yourself, then it is impossible to believe in anybody else. Commitment, Courage and Hard Work are the qualities every person should develop in them. Commitment is the important factor for success of individuals. Commitment ignites action. It implies a pledge from you to a certain purpose. It signifies "Standing for Something" through determination and persistence.

Communication skills also plays a important role for self-confidence.

Communication is all about conveying our messages to other people clearly and unambiguously. By effectively communicating our message across, we convey our thoughts and ideas effectively. If our communication is poor, the thoughts and ideas that we actually send across do not reflect what we really think.

Beyond all these qualities, it is love that binds us each other. "Love opens the most important gates. Love is the gate to all secrets of the universe. Every step that has been really gained in the world has been gained by love."

A combination of various noble qualities, i.e., faith, commitment, hard work, courage, communication skills and love all together builds self-confidence. It is not too difficult to attain. Self-Confidence can be easily learnt and built.

## **20. EDUCATION QUALIFICATION FOR POLITICIANS**

Since, we are living in a technological world where daily new developments, innovations are taking place, and to understand its modern technique through scientists and inventors, education plays a key role. And at least to understand this in an appropriate manner a politician must be educated to express his country's developments in other countries.

Having educational qualifications should not be the sole criterion for electing a leader. They should have good qualities to serve people. Hence having the right educational background and qualifications are important because education acts as a foundation for implementing policies. Only when people are aware of the problems can think of the solutions.

So, potential candidates should at least have a degree in fields that are relevant in the political arena. A politician must know the country's wealth and problems and get ready for facing upcoming situations.

## **21. ANDROID TECHNOLOGY**

One of the most widely used mobile OS these days is ANDROID. Android is a software bunch comprising not only operating system but also middle ware and key applications. Android Inc was founded in Palo Alto of California, U.S. by Andy Rubin, Rich miner, Nick sears and Chris White in 2003. Later Android Inc. was acquired by Google in 2005. After original release there have been number of updates in the original version of android.

The mobile development community is at a tipping point. Mobile users demand more choice, more opportunities to customize their phones, and more functionality. Mobile operators want to provide value-added content to their subscribers in a manageable and lucrative way. Mobile developers want the freedom to develop the powerful mobile applications users demand with minimal roadblocks to success. Finally, handset manufacturers want a stable, secure, and affordable platform to power their devices. Up until now single mobile platform has adequately addressed the needs of all the parties.

Enter Android, which is a potential game-changer for the mobile development community. An innovative and open platform, Android is well positioned to address the growing needs of the mobile marketplace.

Android comes with an Android market which is an online software store. It was developed by Google. It allows Android users to select, and download applications developed by third party developers and use them. There are around 2.0 lack+ games, application and widgets available on the market for users.

## **22.CHILD LABOR**

Children under 14 years working as a labour are considered as Child labour. Child labour refers to the employment of children in any work that deprives children of their childhood, interferes with their ability to attend regular school, and that is mentally, physically, socially or morally dangerous and harmful. This practice is considered exploitative by many international organizations. Legislations across the world prohibit child labour. These laws do not consider all work by children as child labour; exceptions include work by child artists, supervised training, certain categories of work such as those by Amish children, some forms of child work common among indigenous American children, and others. Almost every country in the world has laws relating to and aimed at preventing child labour. International Labour Organization has helped set international law, which most countries have signed on and ratified.

Let us provide you some more topics on JAM as follows.

1. Words of Wisdom- Share the best words of wisdom from your life and share how it helped you in making your life easy.
2. Being 10 Years-old Again- What if you go back to your childhood days and start your life again after 10 years of age.
3. Starting a New Business- Nowadays Entrepreneurship is on boom, If given an opportunity what's your business idea and business plan?
4. Getting Published- What if a publisher call you to publish your book, what will be the title of your book?
5. Most memorable meal- Describe the best meal you had with your lovable s and what made it memorable to you.
6. Favorite food- What is your favorite food, and why so.
7. Least favorite food- What's your least favorite food, and explain why it so?
8. A Second Chance- What is that one thing you want to rewind in your life?
9. Stand Up and Speak- Speak on anyone topic which you want to.
- 10.The joy of dancing- Share your experiences with dance, if you've ever danced as if nobody is watching you, share your story.
- 11.Rock Climbing- Share your fantasy with rock climbing, if you have any prior experiences with trekking a mountain or if you have climbed any rock.
- 12.Apples are my favorite fruit: Doctor says an apple a day, keeps a doctor away. Share your amazing reasons why apple is your favorite fruit.
- 13.Bananas are better- What if given a chance you to promote the banana over any other fruit.
- 14.Before They Were Famous- Name any one of your idols and share the story of them before they were famous and what made them famous today.
- 15.Million-Dollar Word- Speak about the best word you feel, and narrate a story with it.
- 16.Life As An Object- Describe Life as if it's an object.
- 17."Bright Lights, Big City"- Which city name come to your mind when you hear this and why.
- 18.Beach Party- Share your beach party experience or what if you got to plan a beach party with your friends.
- 19.Yesterday- Share about your yesterday.
- 20.Back-To-School- Describe the best and worst part of your school days.

21. Public Speaking- What comes to your mind when you heard this word public speaking, share your experiences and explain how one can progress in public speaking?
22. If you were to die today, what will be your last wish?
23. Your dream holiday destination
24. What do you love more- coffee or tea?
25. EBooks vs. paper books
26. The one change I want to bring to education system of India
27. Why I love/hate WhatsApp?
28. What will people remember me for after I die
29. My most weird moment at school/work
30. Why I love Android (iOS) over iOS (Android)?
31. My guilty pleasure which you don't know about.
32. Actor / Cricketer you admire
33. Politics
34. Current Affairs
35. Demonetization
36. Current Technologies
37. Women Education
- 38.
39. My biggest concern for the future is...
40. Real wealth is never measured in money or possessions.
41. Conservation is survival.
42. Real love is not the stuff of pop songs.
43. If I were an animal I'd be a...
44. Plants have feelings too.
45. Junk food's popularity relies on marketing.
46. To err is human. To forgive is divine. Discuss.
47. The world is a smaller place these days.
48. The more we communicate, the less we really say.
49. When I grow up...
